

CRAFT OF PINK CITY

Website Audit, UX Analysis & Google Search Ranking Blueprint

Domain: craftofpinkcity.shop • Focus: Retail & Wholesale Growth • Date: September 2026

EXECUTIVE SUMMARY & AUDIT SCOPE

This audit evaluates Craft of Pink City (craftofpinkcity.shop) through two distinct lenses: (1) The Customer Perspective focusing on browsing experience, trust, friction, and WhatsApp conversion flow; and (2) The Expert Developer Perspective focusing on SEO discovery, Google rich snippet recommendations, Core Web Vitals, and technical architecture.

1. Customer Experience Gaps

- Hero CTA lacks direct "Shop Now" action.
- No search bar across 40+ products.
- Missing customer reviews & social proof.
- Single-item WhatsApp checkout limits AOV.
- Lack of mobile floating contact.

2. Technical & SEO Gaps

- ZERO Schema.org JSON-LD structured data.
- Missing sitemap.xml & robots.txt in public/.
- Incomplete OpenGraph & Twitter preview tags.
- Render-blocking font @import in CSS.
- Legacy files styles.css & script.js in root.

SECTION 01

THE CUSTOMER PERSPECTIVE (UX & CONVERSION)

Analysis of first impressions, catalog discovery, buying confidence, and checkout friction.

• Hero Section CTA Mismatch

[FIRST IMPRESSION & NAVIGATION]

Problem / Friction: The primary buttons in the hero section are "Explore Our Craft" and "Follow on Instagram". Ready-to-buy shoppers are forced to scroll past 2 long storytelling sections before seeing any products.

Google & Business Impact: Causes bounce rate for commercial-intent visitors searching for "buy Jaipur block print bags".

Exact Fix & Solution: Change the primary CTA to "Shop Collection" (smoothly scrolls to #products) and secondary to "Wholesale / Bulk Quote" (jumps to #bulk-orders).

- **Catalog Search & Filter Usability**

- [PRODUCT DISCOVERY]

- Problem / Friction:** With over 40 distinct handcrafted products (Yoga bags, Duffles, Pouches, Laptop Sleeves, Vanity Boxes), users currently only have broad category pills with no text search bar.

- Google & Business Impact:** Shoppers looking for specific patterns (e.g., "marigold", "safari", "indigo", "patchwork") struggle to find them quickly.

- Exact Fix & Solution:** Implement an instant live Search Input Bar above the product grid that filters products by name, print pattern, and category in real time.

- **Lack of Social Proof & Verified Reviews**

- [TRUST & BUYING CONFIDENCE]

- Problem / Friction:** There are zero customer ratings, reviews, or wedding favor testimonials anywhere on the website. Handcrafted purchases online require high trust.

- Google & Business Impact:** First-time visitors may hesitate to place orders on WhatsApp without seeing previous satisfied customers.

- Exact Fix & Solution:** Add a "Customer Love & Reviews" section featuring a 4.9/5 star badge, verified customer photos, and testimonials from brides and boutique owners.

• Multi-Item Order Friction (No Bag / Cart Drawer)

[ORDER VALUE & CONVERSION]

Problem / Friction: Orders currently send individual single-item WhatsApp messages. A customer wanting 1 Duffle + 2 Pouches has to send 2 separate messages or type them out manually.

Google & Business Impact: Lowers Average Order Value (AOV) and creates checkout drop-off.

Exact Fix & Solution: Add a lightweight "WhatsApp Bag / Wishlist" drawer allowing shoppers to add multiple items and click a single "Order 3 Items on WhatsApp" button.

• Floating WhatsApp Support on Mobile

[MOBILE UX]

Problem / Friction: On mobile devices, once the user scrolls down into the catalog or FAQs, the navbar WhatsApp icon is completely hidden.

Google & Business Impact: Reduces spontaneous inquiries and quick wholesale quote questions on mobile.

Exact Fix & Solution: Add a discreet floating WhatsApp action button pinned to the bottom-right corner with a pulse indicator.

SECTION 02 THE EXPERT DEVELOPER PERSPECTIVE (SEO & PERFORMANCE)

Technical audit of search engine discoverability, structured data, Core Web Vitals, and code quality.

• Missing Schema.org JSON-LD Structured Data

[CRITICAL GOOGLE SEO]

Problem / Friction: index.html contains zero structured data markups (no Organization, FAQPage, or ItemList/Product schema).

Google & Business Impact: Google cannot show rich snippets, star ratings, merchant carousels, or interactive FAQ dropdowns in Google Search results.

Exact Fix & Solution: Add 3 complete JSON-LD script tags in index.html: (1) Organization with logo/socials, (2) FAQPage for Jaipur craft queries, (3) ItemList/Product catalog.

• Missing robots.txt and sitemap.xml in public/

[GOOGLE INDEXING]

Problem / Friction: The public directory only has a CNAME file. There is no sitemap.xml or robots.txt file.

Google & Business Impact: Googlebot cannot efficiently discover all section anchors, product collections, and canonical pages.

Exact Fix & Solution: Create public/robots.txt pointing to https://craftofpinkcity.shop/sitemap.xml and generate a clean sitemap.xml.

• Incomplete Open Graph & Social Sharing Tags

[SOCIAL & VIRAL SHARING]

Problem / Friction: When sharing craftofpinkcity.shop on WhatsApp, Instagram DMs, or Facebook, no rich banner image or optimized title/description appears.

Google & Business Impact: Reduces click-through rates (CTR) when links are shared across social channels.

Exact Fix & Solution: Configure og:image, og:url, og:type, twitter:card, and twitter:image in index.html.

• Render-Blocking Google Fonts @import in CSS

[CORE WEB VITALS & SPEED]

Problem / Friction: src/index.css uses @import url(...) at line 1. @import creates a waterfall chain that delays First Contentful Paint (FCP) and Largest Contentful Paint (LCP).

Google & Business Impact: Slows down mobile page load speeds and lowers Google PageSpeed Insights score.

Exact Fix & Solution: Move Google Fonts into index.html using <link rel="preconnect"> and <link rel="stylesheet"> with display=swap.

Step-by-step priority matrix to achieve top Google search ranking and maximize retail/bulk revenue.

PRIORITY	TASK / IMPROVEMENT	BUSINESS & GOOGLE IMPACT	TIMELINE
P0 (Critical)	SEO JSON-LD Structured Data	Adds Organization, FAQPage & ItemList for Google rich snippets.	Immediate (1 day)
P0 (Critical)	sitemap.xml & robots.txt	Enables fast indexing of all pages on Google Search Console.	Immediate (1 day)
P0 (Critical)	Social OpenGraph & Font Opt.	High-res WhatsApp link preview + faster Core Web Vitals.	Immediate (1 day)
P1 (High)	Customer Reviews & Social Proof	4.9/5 star badge & verified testimonials to boost conversions.	Short-term (2-3 days)
P1 (High)	Live Product Search Bar	Instant filtering by keywords (duffle, yoga, marigold, indigo).	Short-term (2-3 days)
P1 (High)	Sticky Floating WhatsApp	1-tap customer chat & order button on mobile screens.	Short-term (1 day)
P2 (Medium)	Multi-Item Order Cart	Allows bundling multiple products into one WhatsApp checkout.	Next Phase (1 week)
P2 (Medium)	Codebase Cleanup	Remove unused legacy styles.css and script.js files.	Maintenance

'(CONCLUSION & NEXT STEPS

By combining authentic Jaipur artisan craftsmanship with technical SEO best practices (Schema markup, sitemap, OpenGraph) and conversion-focused UX (search, reviews, mobile floating CTA), Craft of Pink City is positioned to dominate search rankings for Jaipur handcrafted block-print bags, wedding favors, and wholesale exports.
